

*Now you can find the information
you really need...*

Evidence-Based Medicine

Editors: B Haynes & D Sackett

With 2 million new papers published each year how can you be sure you read all the papers essential for your daily practice, and how can you be sure of the scientific soundness of what you do read? One answer to this dilemma is practising evidence based medicine, basing clinical decisions on the best available scientific evidence.

To meet this need the BMJ Publishing Group together with the American College of Physicians is launching a new journal - *Evidence - Based Medicine*. This new journal is a development of the ACP Journal Club.

Published bi-monthly *Evidence - Based Medicine*, will survey a wide range of international medical journals (at least 70) to identify the key research papers that are scientifically valid and relevant to practice.

**Launching in September 1995.
Evidence-Based Medicine will:**

- use scientific criteria to select the abstracts from the most important papers from the world's leading journals
- select only those papers which have a direct message for practice
- provide commentaries on the abstracts which will make clear the importance of the papers
- supply educational material to teach you about evidence based medicine
- cover all medical advances that are really important
- cover internal medicine, and the major specialties, including general surgery, paediatrics, obstetrics & gynaecology, psychiatry, general practice, anaesthesiology and ophthalmology.

“Something for the next five years sir?”

SmithKline Beecham
VACCINES

SmithKline Beecham Pharmaceuticals
Welwyn Garden City, Hertfordshire AL7 1EY.

Presentation: Each 1 ml of 'Engerix B' hepatitis B vaccine (rby), PL 10592/0015, contains 20 micrograms of hepatitis B surface antigen protein, together with thiomersal 1:20,000. Pack of 1 (1 ml) prefilled syringe containing 20 micrograms, £12.13; pack of 10 (1 ml) prefilled syringes each containing 20 micrograms, £121.30; pack of 1 (1 ml) vial containing 20 micrograms, £11.95; pack of 3 (1 ml) vials each containing 20 micrograms, £35.85; pack of 10 (1 ml) vials, £119.50; pack of 1 paediatric (0.5 ml) vial containing 10 micrograms, £8.96.

Uses: Active immunisation against infections caused by hepatitis B virus.

Dosage and administration: For intramuscular use only. Shake well and inspect before use. Three doses should be given, the

second one month and the third six months after the initial dose. For more rapid immunisation the third dose can be given two months after the initial dose with a booster at 12 months.

Adults and children over 12 years: 20 micrograms (1 ml) given intramuscularly.

Neonates and children 12 years and under: 10 micrograms (0.5 ml) given intramuscularly.

Administer in the deltoid region, though the antero-lateral thigh is the preferred site for infants. 'Engerix B' should not be administered in the buttock since this may result in lower immune response. In neonates of HBsAg positive mothers, give hepatitis B immunoglobulin at the same time as vaccinating at different sites within a few hours of birth.

'Engerix B' isn't just something for the weekend. It provides up to five years' protection against hepatitis B; which means you don't have to rely on your patients using a condom every time they have sex.

So who's at risk? People who are sexually active, either with multiple partners, or who travel abroad and have casual, unprotected sex.

The fact is hepatitis B can be contracted in the same way as AIDS, but it's 100 times more infectious. Worst still, it has been found in body fluids such as sweat, saliva, even tears.

It's quite reassuring to know then that, world-wide, 'Engerix B' has protected more people against the hepatitis B virus than any other vaccine.

You can order 'Engerix B' in pre-filled syringes, by calling SmithKline Beecham on 0181-913 4290. So, even if you can't prevent your patients from picking up every sexually transmitted disease, you can give them five years' protection against hepatitis B.

Contra-indications: Hypersensitivity to any component of the vaccine. Severe febrile infections.

Precautions: Response may be impaired in renal dialysis patients and those who are immunocompromised. Adrenaline 1:1000 should be available in case of anaphylaxis. Use in pregnancy: see package leaflet.

Adverse reactions: Mild transient local soreness, erythema and induration at the injection site. Occasionally low grade fever, malaise, fatigue, arthralgia, arthritis, myalgia, headache, dizziness, syncope, nausea, vomiting, diarrhoea, abdominal pain, lymphadenopathy, abnormal liver function tests, rashes rarely including urticaria. Exceptionally, severe skin disorders such as erythema multiforme. Very rarely one week or more after

injection, transient arthralgia, pruritus or urticaria, but no causal relationship established.

Neurological manifestations in temporal association with the vaccine, including very rarely paraesthesia and extremely rarely paralysis, neuropathy and neuritis (including Guillain-Barré syndrome, optic neuritis and multiple sclerosis). No causal relationship established.

Early onset allergic-type reactions reported rarely.

Legal category POM. 11.8.94.

'Engerix B' is a trade mark.

Health care: the way ahead

Controversies in Health Care Policies: Challenges to Practice

Edited by Marshall Marinker

Can health policy ever be completely right?

This book explores how to get it right in six of today's most important issues: rational prescribing; primary care following Tomlinson; public access to medical information; the meaning of aging; medical practice variation; and risk in medicine.

Outcomes into Clinical Practice

Edited by Tony Delamothe

**Why do outcomes research?
How should it be done?**

These crucial questions are addressed in this ground breaking book, based on the conference held by the BMJ, BMA, and UK Clearing House for Information on the Assessment of Health Outcomes. In it, experts in the field cover a wide range of topics including acute care; cost effectiveness; death rates; health gains; and general practice.

CONTROVERSIES *in* HEALTH CARE POLICIES *Challenges to Practice*

EDITED BY
MARSHALL MARINKER

BMJ
Publishing Group

- Essential reading for all involved in making and implementing health care policies.

- Documents the work of six think tanks of clinical experts, GPs, managers, and patient representatives

- Includes input from the Kings Fund, NAHAT, Age Concern, RCGP, National Medical Adviser Support Centre, Social Market Foundation

- Offers innovative and realistic ideas for the way forward

- Shows how information on outcomes can be used to improve care

- Gives examples of outcomes research at its best

- Looks at the subject from all perspectives in the health service

- Provides an ideal starting point for all members of clinical teams, both in hospitals and general practice, and is invaluable for health care purchasers and clinical audit officers.

How to do it even better!

The highly popular *How To Do It* series is a collection of expert advice on an enormous range of topics that doctors need to know about that are not necessarily covered in formal training.

All three volumes have now been completely updated, with new chapters, and a user friendly format where subjects are grouped into themes. Whether you want to chair a committee, improve your counselling skills with cancer patients, or even survive a formal dinner, your questions will be answered in these entertaining and practical guides.

A must for all doctors, from students through to the retired.

Statistics at Square One 9th Edition

T D V Swinscow,
revised by **M J Campbell**

This step-by-step guide has helped thousands of readers get to grips with the basic tools of statistics. Now completely revised and expanded it remains the essential primer for students and specialists alike.

- Includes new chapters on survival analysis and design of studies
- Uses examples from medicine to illustrate techniques, such as the 2 test, non-parametric tests and correlation
- Describes the newer techniques, such as stem and leaf plots, box-whisker plots and unequal variance t-tests
- Answers all of the common questions about statistics and offers exercises for self-testing

January 1996 152 pages
UK £8.95; Overseas £11.00
(BMA members £7.95; £10.00)

Statistics in Clinical Practice

David Coggon

Statistics in Clinical Practice is a practical, easy to read guide to demystifying statistics which will show you how to interpret data and present statistical information yourself.

- Covers all the basic principles including probability, making conclusions based on statistical results and summarising data
- Contains realistic clinical examples
- Assumes only a basic knowledge of mathematics
- Includes useful question and answer sections to test yourself

128 pages 1994
UK £10.95; Overseas £12.95
(BMA members £9.95; £12.00)

Medical Statistics on Personal Computers

R A Brown, J Swanson Beck

Explains how to get the best out of software available for analysing statistical data on PC's.

160 pages Second edition 1994
UK £10.95; Overseas £13.00
(BMA members £9.95; £12.00)

Statistics with Confidence

Martin J Gardner, Douglas C Altman

Gives reasons for using confidence intervals, followed by detailed methods of calculation, including numerous worked examples and specially compiled tables.

156 pages 1989
UK £10.95; Overseas £13.00
(BMA members £9.95; £12.00)

Confidence Interval Analysis (CIA)

Martin J Gardner, Stephen B Gardner, Paul D Winter

This microcomputer disk with manual can be used alone or with *Statistics with Confidence*.

Software is available for IBM compatibles on either 5 1/4 or a 3 1/2 inch disk.

82 pages 1989
UK £65.00 Educational establishments, research institutes and the NHS; £45.95 (inc VAT)

Statistics in Practice

Sheila M Gore, Douglas G Altman

107 pages 1982
UK £10.95; Overseas £13.00
(BMA members £9.95; £12.00)
